

Chiluka Rekha

Aspiring Business Intelligence Analyst

rekha004295@gmail.com | +91 93905 58320 | Kamareddy, India | github.com/chiluka-rekha

SUMMARY

Aspiring Business Intelligence Analyst with hands-on project experience across SQL, Excel, and Power BI. Built three end-to-end analytics projects covering data preparation, analytical querying, KPI development, trend analysis, and interactive dashboard reporting. Focused on turning raw business data into structured, decision-ready information through clear metrics and visual reporting.

PROJECTS

SQL Retail Sales Analysis — SQLite

Global Superstore dataset | github.com/chiluka-rekha/ba-portfolio/01-SQL-Retail-Analysis

Developed 20+ SQL queries across data exploration, sales, customer, and product analysis. Calculated and compared sales metrics by category, region, segment, product, and time period, using aggregation, GROUP BY, JOINS, CASE WHEN, date functions, subqueries, and window functions to produce business-focused analysis.

Excel Retail Sales Dashboard — Microsoft Excel

Global Superstore dataset | github.com/chiluka-rekha/ba-portfolio/02-Excel-Retail-Dashboard

Cleaned and structured 9,800+ rows of retail order data, created pivot-based analysis for category, region, segment, state, shipping mode, and product performance, and consolidated the analysis into an interactive dashboard for KPI and management-style reporting.

Power BI Healthcare Analytics Dashboard — Power BI Desktop

Healthcare dataset | github.com/chiluka-rekha/ba-portfolio/03-PowerBI-Healthcare-Dashboard

Designed an interactive healthcare BI dashboard covering patient volume, demographics, admissions, billing, insurance, medical conditions, and test results. Built KPI measures with DAX, prepared data with Power Query, and used slicers and cross-filtering to support interactive operational analysis.

BI SKILLS

SQL	SELECT, WHERE, GROUP BY, JOIN, CASE WHEN, aggregate functions, date functions, subqueries, CTEs, window functions
Excel	Data cleaning, formulas, PivotTables, summary analysis, dashboard design, reporting
Power BI	DAX, Power Query, data modeling, KPI reporting, slicers, cross-filtering, interactive dashboards
BI & Analytics	KPI analysis, trend analysis, performance reporting, data preparation, visualization, insight generation
